December 7, 2023

The Board of Directors of the Augusta Water And Interested Parties

On November 28, 2022, the Augusta County Service Authority filed a fictitious name certificate with the Commonwealth of Virginia State Corporate Commission to conduct business as Augusta Water. The Annual Financial Report for Augusta Water is hereby submitted for the fiscal years ended June 30, 2023 and 2022. The By-Laws of Augusta Water, consistent with the Virginia Water and Sewer Authorities Act, requires Augusta Water to undergo an independent audit as soon after the close of the fiscal year as possible and as required by bond resolutions. Augusta Water's Master Indenture of Trust for water and sewer bonds, issued in 1994, requires a complete set of audited financial statements be delivered to the trustees, the municipal bond insurance company and subsequent bond issuers no later than 180 days after the end of each fiscal year (Article IX, Sect. 9.10). This report is published to fulfill these requirements for the fiscal year ended June 30, 2023.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that has been established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

PBMares, LLP, Certified Public Accountants, have issued an unmodified "clean" opinion on Augusta Water's financial statements for the year ended June 30, 2023. The independent auditor's report is located at the front of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements over the last two years. The MD&A complements this letter of transmittal and should be read in conjunction with it.

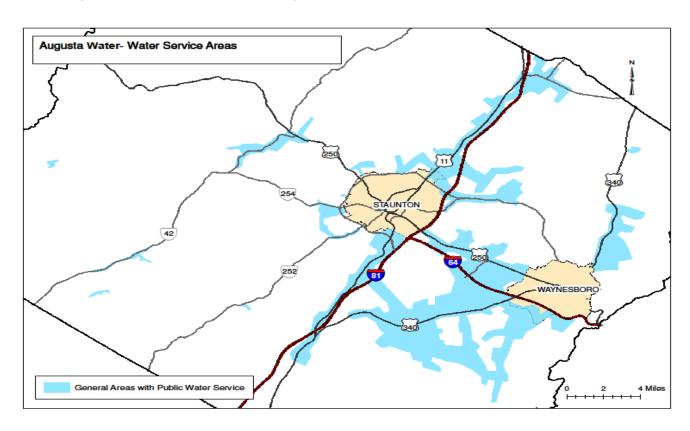

A Board of Directors, consisting of seven members appointed by the Augusta County Board of Supervisors for staggered four-year terms, governs Augusta Water. One of the board appointments is currently filled by an elected member of the Board of Supervisors. (See directory of Augusta Water Officials in this introductory section). Augusta Water's Executive Director has overall responsibility for its operations and 117 full and part-time employees.

Augusta County is centrally located in the Shenandoah Valley in west-central Virginia, approximately 100 miles from the state capital of Richmond. The County is bounded on the west by the lower elevations of the Allegheny Mountains and on the east by the crest of the Blue Ridge Mountains. The County was formed in 1738 and is the second largest county in Virginia, encompassing 968 square miles of diverse terrain. The County is made up of seven magisterial districts with an overall population of 78,064 and surrounds the independent cities of Staunton and Waynesboro (with estimated populations of 25,904 and 22,808, respectively).

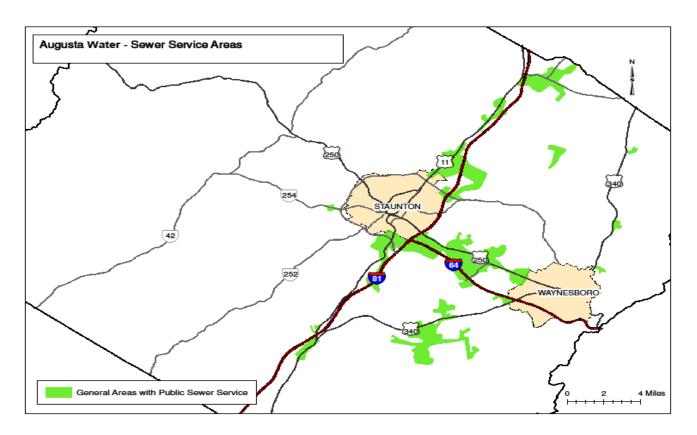

Prior to the creation of Augusta Water, sanitary districts installed wastewater collection and treatment facilities to serve the small towns that had developed along major highway corridors. Such communities

also developed water systems. In 1966, when Augusta Water was formed, it took over these various assets and operations as well as several small developer-installed systems. Inter-jurisdictional agreements for water supply and wastewater treatment also exist with the independent political subdivisions of the cities of Staunton and Waynesboro and the Town of Craigsville. Augusta Water sells approximately 2.56 million gallons per day (mgd) produced from its own water facilities and 1.06 million gallons per day purchased from Staunton under a long-term contract. Augusta Water has an overall storage capacity of 13 million gallons. It maintains wastewater treatment facilities with a combined treatment capacity of over 15.9 mgd, of which 4.9 mgd is owned by Staunton. Augusta Water provides water service to 15,696 customers and sewer service to 9,593 customers. Historical trends and additional operational information can be found in Table 20 of the Statistical Section.

The largest area served by Augusta Water's water system is South River, which includes the U.S. 250 corridor between Staunton and Waynesboro, the U.S. 11 corridor south of Staunton, and the Sherando and Stuarts Draft areas. The second largest water service area is the combined Verona/Weyers Cave systems, which primarily serves customers along U.S. 11 north of Staunton. Smaller systems include the Augusta Springs system along Route 42, the Deerfield system in the George Washington National Forest, the Estaline Valley system along Route 601, the Rt. 250 West and Blackburn systems near Staunton, the Churchville system along Route 42 near U.S. 250, the Harriston and Vesper View systems along U.S. 340 north of Waynesboro, and the Middlebrook system near the intersection of Routes 252 and 676.

The four largest wastewater treatment systems are the Fishersville, Middle River (Verona), Stuarts Draft, and Weyers Cave systems, as shown below. Additional wastewater systems include Harriston, Mount Sidney, New Hope, Greenville and Vesper View.

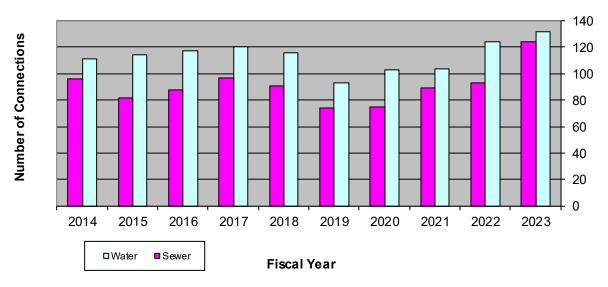

Augusta Water also operates and serves as fiscal agent for the Augusta Regional Landfill for Augusta County, Staunton and Waynesboro. Fourteen of the 111 Augusta Water full-time employees work to operate this solid-waste facility as well as part-time allocations of some Augusta Water administrative and engineering staff. In fiscal year 2023, the landfill received 160,000 tons of solid waste and generated operating revenues of \$3.9 million. The landfill financial transactions are shown only as a custodial fund statements in this report.

Both the By-Laws of Augusta Water and its Master Indenture of Trust require Augusta Water to adopt an annual operations and maintenance budget before the start of the new fiscal year. This annual budget, which is created from the input of all divisions, serves as the foundation for Augusta Water's financial planning and control. The executive team then uses this budget in an in-house rate-setting model to annually re-examine user rates. They determine if the rates are adequate over a four year period to cover projected operating Capital Improvement Projects (CIP) as well as a number of other parameters including the debt service coverage ratio, rate-setting recommendations, and cash flow requirements. The Board examines the prepared financial plan, approves any rate increases (after a properly advertised public comment period), and adopts the annual budget.

Local Economic Condition and Outlook

Augusta County experienced an estimated population growth of 5.6% over the period 2013 to 2022, 0.7% more than the 4.9% growth of the state. The number of new customers connecting to Augusta Water's public water and sewer systems reflects a slightly higher growth rate in a similar ten-year period (8% water and 9% sewer), see the graph below with details in Table 11 of the statistical section). However, the past ten years have shown a definite slowdown due to the depressed housing market. In previous years, readily available real estate and a construction boom along the two major interstate highways had led to this earlier, high customer growth rate. New citizens have been willing to commute to the nearby cities of Charlottesville and Harrisonburg or take advantage of new jobs created by the regional medical complex, shopping centers or business parks formed near the interstate exits. Single-family home permits and new home construction were down 5% in Augusta County during 2022, down from being steady in 2021. Since new connections for Augusta Water are roughly correlated to new construction, Augusta Water is anticipating only modest revenue in the next few years from new customers.

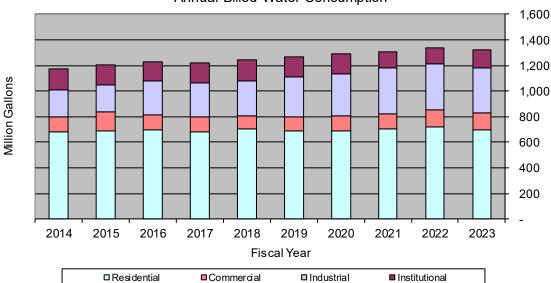

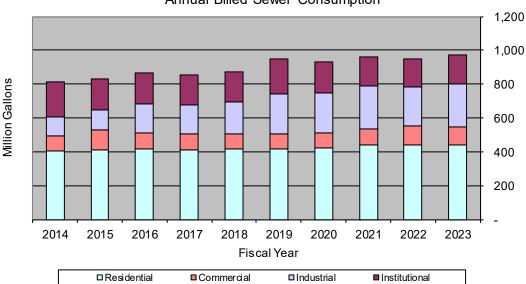

The general economic condition for the Augusta County-Staunton-Waynesboro MSA has historically been below Virginia's average due to its rural nature. The national recession hit the area hard in 2008 and 2009 with a significant loss of manufacturing jobs. This labor segment had previously generated over 25% of the area's revenue. June 2023 reports indicate unemployment was 2.6%, a decrease from 2.7% reported in June 2022. The good news for the area is economic indicators are showing a more positive movement over the last twelve months.

Augusta Water's overall water consumption and sewer treatment levels remained relatively unchanged in fiscal year 2023 after increasing 1.0% in fiscal year 2022. The graphs below, with details in Table 12 of the statistical section, indicate that Augusta Water has shown increases in the gallons of water billed and sewer treated in each of the last five years. Overall water consumption decreased 1.1% and sewer treatment increased 2.3% for fiscal year 2023. The water consumption decrease was driven mainly by residential customers while the sewer treatment increase was driven mainly by industrial and institutional customers. Augusta Water periodically reviews the consumption and revenue of its major customers to make adjustments in budget projections as needed. The top ten customers utilize 29% of the billed water and 37% of the billed sewer treatment. The percentage changes from fiscal year 2023 to 2022 shown in Tables 13 and 14 of the statistical section indicate the top ten customers generated 11% more revenue in 2023 while water consumption decreased 3% and sewer treatment increased 8%.

Augusta Water
Annual Billed Sewer Consumption

Major Initiatives and Long-term Financial Planning

Augusta Water is subject to regulatory compliance from both state and federal regulatory agencies that are issuing new guidelines in relation to the Safe Drinking Water Act, the Clean Water Act, Homeland Security, Dam Safety Regulations, and initiatives to clean up the Chesapeake Bay. These guidelines accelerate any issues in regards to aging infrastructure as well as the demand for more advanced levels of treatment for water and wastewater. Augusta Water's management team stays current on these pending regulations and develops their 4-year capital plan as proactively as possible. In this regard, the Augusta Water has instituted an asset management system over the last ten years as a way of managing its infrastructure.

The cornerstone programs of Augusta Water's Asset Management System are:

- development and adherence to an Augusta Water Master Plan which supports the County's Comprehensive Plan,
- completion of a comprehensive Geographical Information System (GIS) with multiple layers that
 can guide capital investment decisions in regards to repair and replacement as well as new
 construction tied into a continuously developing electronic work order system,
- careful review of site plans and inspection of constructed or dedicated infrastructure—to monitor compliance with Augusta Water's Design and Construction Standards,
- use of an in-house rate model that annually examines rate components to evaluate all costs for maintaining the infrastructure as well as operating the facilities,
- data gathering from extensive SCADA systems that allow real-time monitoring of remote locations so that Augusta Water's widespread infrastructure is protected and maintained in a timely fashion,
- consistently set aside reserves equivalent to depreciation to fund repair and replacement projects.

This year Augusta Water was involved in the following major projects in order to proactively manage its infrastructure:

- Construction of a new Field Operations building.
- Infrastructure replacement and rehabilitation projects were initiated or completed in the following areas:
 - capital equipment/vehicle purchases
 - water tank rehabilitation
 - inflow and infiltration reduction projects
 - several substandard waterline replacement projects
 - generator replacement
 - equipment replacement at wastewater treatment plants.

Relevant Financial Policies

The Board of Directors of Augusta Water annually reviews budget assumptions and rate-setting parameters during the budget process to ensure rates are increased equitably and in annual increments small enough that customer affordability is maintained and "rate shock" is reduced while covering all operational expenses and allowing most of the repair and replacement projects to be financed from the operating fund. (See Tables 2-4 in the statistical section for operating revenue and expenses over the past ten years as well as Tables 8 and 9 for the annual increases in user rates.) Therefore, using the annually updated rate model, four year CIP and other analysis in accordance with these Board-approved guidelines and the bond covenants, the Board approved a 3% variable water rate increase and a 3% variable sewer rate increase.

Availability fees for new connections are very conservatively budgeted due to unpredictable nature of the housing market. These one-time revenue sources are placed in water and sewer reserves and used only for construction and partial payment of debt service on capacity-related projects in accordance with Board-approved guidelines. (See Tables 6 and 10 for historical trends on availability fee revenue and the availability fee structure.)

Staff continues to carefully evaluate Augusta Water's cash and investment holdings along with investment policies. Augusta Water's holdings continue to be diversified. \$1.8 million is invested through local and regional banks in laddered Certificates of Deposit, purchased under the Virginia Security for Public Deposits Act guidelines. \$11.2 million has been invested in the Virginia Local Government Investment Pool and money market accounts. Interest earnings increased 506.5% during fiscal year 2023 due to higher interest rates for cash deposits.

Long-term Financial Planning and Future Initiatives

Changes in the County's comprehensive plan and its impact on Augusta Water's developing master plan, steady population growth, and increasing regulations governing water and wastewater treatment, present a number of challenges for Augusta Water over the next few years. Augusta Water has developed several strategies to assist in the financial planning for capital projects and to maintain fiscal sustainability.

- Cash reserves were built, not only to provide cushion for unpredictable regulatory mandates and unforeseen contingencies, but also to stabilize user rates, to reduce the cash flow impact of Augusta Water's significant semi-annual debt service payments, to protect itself against revenue shortfalls, and to enable favorable financing terms with creditors. These cash reserves increased in 2023 but are projected to drop over the next few years as Augusta Water implements its capital plan. While these reserves will be spent down they will be managed not to decline below the prudent guidelines established by the Board.
- Both operational and capital expenses are monitored regularly against the budget so cost-saving measures can be deployed on a timely basis. In fiscal year 2023 actual operating expenses were 1.5% below budget. In fiscal year 2022 actual operating expenses were 5.4% below budget (see Schedule 2 before the Statistical Section).
- Augusta Water uses its rate model to project the financial consequences of various "what-if" scenarios throughout the year. This is done in order to anticipate any major changes in the short or long-term financial plans and to remain in compliance with our financial guidelines.
- Augusta Water continues to request the County and/or developers assist with the capital expense for projects that are driven primarily by economic development or new County fire flow regulations.

Total outstanding long-term debt and other obligations for Augusta Water exceeded \$14.4 million as of June 30, 2023. Although Augusta Water is obligated to pay \$3.5 million next year in debt service payments, Augusta Water has been able to take advantage of the low interest rate environment over the past few years along with cash reserves to fund major portions of its capital improvement plan.

Furthermore, these low cost or interest-free loans (see Note 6 in the Notes to the Financial Statements section for loan and refunding details) are often coupled with grant funds and capital contributions from other entities or developers to reduce the long-term burden on the rate payer for a high level of capital improvements.

Table 15 in the statistical section shows the debt per connection and as a percentage of median household income has been steadily decreasing from 2012 levels (the completion of the three major mandated wastewater treatment plant upgrades). Table 16 shows that the debt coverage ratio has remained over 1.30 (FY2013 debt coverage ratio) even with the decline in the local, state and national economies and the additional debt service payments as a result of the three major mandated wastewater treatment plant upgrades.

An actuarial firm conducted a study as of June 30, 2021 to determine the net pension liability of Augusta Water under GASB Statement 68 for this period. Note 10 describes Augusta Water's current plans with the Virginia Retirement System and the net pension asset of \$107,240 this year.

An actuarial firm conducted a study as of July 1, 2022 to determine other post-employment benefits (OPEB) liability under GASB Statement 75 for this period. Note 8 describes Augusta Water's current payas-you-go OPEB Health Care policy and the net OPEB obligation of \$516,176 this year.

An actuarial firm conducted a study as of June 30, 2021 to determine the other post-employment benefits (OPEB) liability under GASB Statement 75 for this period. Note 9 describes Augusta Water's current Group Life Insurance Program with the Virginia Retirement System and the net OPEB obligation of \$289,960 this year.

Awards and Acknowledgments

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Augusta Water for its annual financial report for the fiscal year ended June 30, 2022. This was the twenty-first consecutive year that Augusta Water has achieved this prestigious award. In order to be awarded a Certificate of Achievement, Augusta Water must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current annual comprehensive financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the efficient and dedicated services of the entire staff of the finance and administration departments. In particular, Augusta Water would like to express its appreciation to Kristen Desper, Accounting Supervisor; Jessica Griffin, Payroll and Accounts Payable Clerk; Deborah Hensley, Staff Accountant, who each played an important role in the preparation of this report. Credit also must be given to the Board members and Senior Management staff for their unfailing support for maintaining the highest standards of professionalism in the fiscal management of Augusta Water.

Sincerely,

Phillip A. Martin, P.E.,L.S.

Executive Director/CEO

INDEPENDENT AUDITOR'S REPORT

To the Honorable Board of Directors Augusta Water

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of the business-type activities and the fiduciary activity of Augusta Water (Authority), as of and for the years ended June 30, 2023 and 2022, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements, as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Authority as of June 30, 2023 and 2022, and respective changes in financial position and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *Specifications for Audits of Authorities, Boards, and Commissions* issued by the Auditor of Public Accounts of the Commonwealth of Virginia. Our responsibilities under those standards and specifications are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Authority and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Authority's ability to continue as a going concern for 12 months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and Government Auditing Standards, we

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether
 due to fraud or error, and design and perform audit procedures responsive to those risks.
 Such procedures include examining, on a test basis, evidence regarding the amounts and
 disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Authority's internal control. Accordingly, no such
 opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Authority's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 4-9 and the required supplementary information on pages 50-57 be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Authority's basic financial statements. The accompanying schedules listed in the table of contents as supplementary schedules, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory section and statistical section but does not include the basic financial statements and our auditor's report thereon. Our opinion on the basic financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 7, 2023 on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

PBMares, LLP

Harrisonburg, Virginia December 7, 2023

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of Augusta Water, we offer readers of our financial statements this narrative overview and analysis of the financial activities of Augusta Water for the fiscal years ended June 30, 2023 and 2022. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found in the introductory section of this report.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to Augusta Water's basic financial statements. Since Augusta Water is engaged in business-type activities, its basic financial statements are comprised of two components: 1) enterprise fund financial statements and 2) notes to the financial statements. Augusta Water also operates and is the fiscal agent for the Augusta Regional Landfill (Landfill) by contractual agreement with the Cities of Staunton and Waynesboro and the County of Augusta and, therefore, includes a custodial fund statement of fiduciary position. This report contains supplementary information in addition to the basic financial statements themselves.

• Enterprise fund financial statements. The enterprise fund financial statements are designed to provide readers with a broad overview of Augusta Water's finances, in a manner similar to a private-sector business. They can be found on pages 10 through 13 of this report.

The Statements of Net Position present information on Augusta Water's assets, deferred outflows of resources, liabilities and deferred inflows of resources with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of Augusta Water is improving or declining.

The Statements of Revenues, Expenses and Changes in Net Position present information showing how Augusta Water's net position changed during the fiscal years. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g. earned but unused vacation leave).

The Statements of Cash Flows disclose net cash provided by or used for operating activities, capital and related financing activities, and investing activities.

- **Fiduciary fund financial statement.** The fiduciary fund financial statement provides information about the financial relationship with the Landfill in which Augusta Water acts solely as an agent for the benefit of the participating localities, to whom the resources belong.
- **Notes to financial statements.** The notes provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes to the financial statements can be found on pages 16 through 49 of this report.

• Other information. In addition to the basic financial statements and accompanying notes, there are other sections of the report that present certain required supplementary information concerning Augusta Water's progress in funding its obligation to provide pension and other post-employment benefits to its employees (pages 50-57). Also presented are budget and actual schedules for fiscal year 2023 income and expenses (pages 58 through 60) and changes in assets and liabilities for the Landfill (page 15). The statistical section following the financial section contains tables with a variety of trends in financial, economic, and operational information.

Financial Highlights

Augusta Water's overall financial position has remained steady as described below:

- Total Net Position increased by \$3.5 million or 2.5% compared to last year. Total assets and
 deferred outflows of resources of Augusta Water exceeded its liabilities and deferred inflows
 of resources at the close of the most recent fiscal year, growing to \$142.8 million. Of this
 amount, \$23.1 million (unrestricted net position), may be used to meet Augusta Water's
 ongoing obligations to customers and creditors.
- Cash flows from operations were a positive \$8.9 million, a decrease from last year's \$9.5 million.
- Cash and cash equivalents (including restricted funds) increased overall by \$0.8 million this year, compared to last year's increase of \$1.8 million.

Statement of Net Position

The following table is a condensed summary of the Statements of Net Position as of June 30, 2023, 2022, and 2021.

	Summary of Net Position As of June 30,					
	_	2023	_	2022		2021

Net position increased 2.5% from last year and increased 5.6% from two years ago. The largest portion of Augusta Water's net position reflects its net investment in capital assets, less any related outstanding liabilities used to acquire those assets. This significant investment reflects the nature of a public utility and is currently 81.7% (capital asset investments to net position). Augusta Water uses these capital assets to provide services to its customers; consequently, these assets are not available for future spending. Although Augusta Water's investment in its capital assets is reported net of related debt, it should be noted the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Augusta Water's net position also consists of restricted and unrestricted net position. Restricted net position includes cash and investments restricted by bond covenant agreements as explained in more detail in Note 1, item E. The majority of these restricted assets are equal to two months of budgeted operating expenses, causing an 8.5% increase from last year due to higher budgeted operating costs for 2023. The unrestricted net position includes all other assets not restricted by an external organization or invested in capital assets. However, almost 53% (down from 55% last fiscal year) of these unrestricted net assets have been internally reserved as part of a rate stabilization policy to provide a cushion against unforeseen contingencies, debt service and provide funding for capital projects. This policy has allowed Augusta Water to adopt moderate user rate increases over the past ten years as can be seen in detail in Table 8 in the statistical section.

The increase in Current and other assets is mainly attributable to higher unbilled accounts receivable and prepaid expenses at year end compared to 2022. The increase in Other liabilities is mainly attributable to higher accounts and compensated absences at year end compared to 2022. The increase in Deferred outflows of resources and Deferred inflows of resources were the result of actuarial changes.

Long-term Debt Activity

Augusta Water's total long-term debt decreased by approximately \$3.1 million during the current year compared to last year's \$3.7 million decrease. The debt coverage ratio for the year is 2.92 (see Table 16 for more information) and continues to remain above the Master Trust Indenture requirement of 1.10.

Augusta Water has 12 bonds issued by the Virginia Resources Authority (VRA). Augusta Water also has one refunding bond issue based on a 1994 public bond issue - a public issue in September 2015. The City of Staunton had \$12.5 million in bonds issued in 2008 and 2009 for the upgrade of the Middle River Regional WWTP, of which Augusta Water is contractually obligated to repay 27.9% based on allocated capacity and ownership of the jointly owned facility (and therefore records 27.9% of the grant revenue, drawdown on the debt and Construction in Progress assets). More detailed information on Augusta Water's long-term liabilities and the advance refundings is presented in Note 5 starting on page 27.

Revenues, Expenses and Changes in Net Position

The results of Augusta Water's operations are reported in the Statements of Revenues, Expenses and Changes in Net Position. The following table presents a summary of this information for the years ended June 30, 2023, 2022 and 2021.

	Changes in Net Position			
	2023	2022	2021	
Revenues:		· .		
Operating revenues:

Total operating expenses	21,803,098	19,537,655	18,602,900	
Nonoperating expenses: interest & other	383,385	469,376	579,808	
Total expenses	22,186,483	20,007,031	19,182,708	
Increase in net position	3,453,660	4,079,348	4,571,891	
Net Position – beginning of year	139,337,200	135,257,852	130,685,961	
Net Position – end of year	\$ 142,790,860	\$139,337,200	\$ 135,257,852	

In fiscal year 2023 Augusta Water net position increased by \$3.5 million, which was a decrease from last year's \$4.1 million increase and the \$4.6 million increase in 2021. Key elements of this change are due primarily to higher operating revenues offset by higher operating expenses whose ten-year trends can be seen in Table 3 and Table 4 of the statistical section:

- Capital contributions, in the form of "availability fees" from newly connected residential and business customers decreased to \$911,960 after reaching \$1,024,394 last year, a decrease of 11%. Funds from availability fees are set aside in special reserves and are used to pay for a portion of the debt service and construction on capacity-related capital projects.
- Contributions of dedicated infrastructure from developers increased to \$181,367 from a fiscal year 2022 level of \$103,268, an increase of 76%.

Operating revenues increased 5.6% this past year while consumption was even with the prior fiscal year. Decreased water consumption by residential and industrial customers and increased sewer consumption by industrial customers along with a rate increase were the main drivers for the increase (see Table 9 and Table 12 for more information). Operating revenues increased 4.2% in fiscal year 2022 due to rate increases and increased consumption of 2.0%. Increased consumption by industrial and residential customers was the main drivers for the increase. Augusta Water has budgeted at the current levels of consumption through fiscal year 2024.

Operating expenses increased 11.6% from fiscal year 2022. The increase was mainly attributed to higher salaries and benefits, electricity, repair and maintenance supplies, depreciation, and chemicals. Fiscal year 2022 increased 5.0% from fiscal year 2021. The increase was mainly attributed to higher salaries and benefits, depreciation, chemicals, fuel and purchased water.

Schedules 1 and 2 show greater detail for fiscal year 2023 on the actual revenue and expenses versus budget comparison and Table 7 shows a full allocation of revenue and expenses between water and sewer activity for fiscal year 2023.

Interest income increased to \$407,859, a 506.5% increase from fiscal year 2022. Interest income increased to \$67,243 in fiscal year 2022, a 21.4% increase from fiscal year 2021. The increase in fiscal year 2023 was due to higher interest rates for cash deposits. Gain on disposal of assets of \$8,274 was mainly attributable to the sale of fleet vehicles and used equipment. Interest expense decreased 18.3% during fiscal year 2023 and decreased 19.0% during fiscal year 2022 due to the lower principal balances on outstanding debt.

Capital Asset Activity

Augusta Water's capital assets remained the same in fiscal year 2023 compared to a 1.5% decrease in fiscal year 2022. Additional information regarding capital asset activity can be found in Note 3 to the financial statements.

The following major capital asset projects were completed during the current fiscal year and were funded as indicated:

Completed Capital Projects/Dedications	F)	/2023 Capital Expense	Total Project Amount
Water Projects:			
Meter & Vault Replacement	\$	111,185 \$	111,185
Generators		53,092	59,838
Water connections		78,750	78,750

NOTES TO FINANCIAL STATEMENTS

Note 1–Significant Accounting Policies:

The Board of Supervisors of Augusta County, Virginia (the County) established the Augusta County Service Authority (the Authority) on March 16, 1966 and the State Corporation Commission chartered the Authority in March 1966 in order to provide a centralized source for the provision of water and sewer service to County residents. The Authority originally existed for a term of 50 years from its date of incorporation, to the year 2016, or until its obligations had been discharged or assumed (whichever was later), and for such further periods as the County Board of Supervisors provided by resolution. On July 24, 2002, the Board of Supervisors approved the extension of the corporate life of the Authority to the year 2052. On November 28, 2022, the Augusta County Service Authority filed a fictitious name certificate with the Commonwealth of Virginia State Corporate Commission to conduct business as Augusta Water.

The Enabling Act authorizes Augusta Water, among other things, (a) to acquire, construct, improve, extend, operate and maintain any water, sewer, sewage disposal or garbage/refuse collection and disposal system, (b) to issue revenue bonds of Augusta Water, payable solely from revenues, to pay all or any part of the cost of such systems, (c) to fix, revise, charge and collect rates, fees and charges for the use of and for the services furnished or to be furnished by any system operated by Augusta Water, and (d) to enter into contracts with the Commonwealth of Virginia (Virginia), or with any municipality, county, corporation, individual or any public authority, relating to the furnishing of services and facilities of any such system of Augusta Water. The Enabling Act provides that Augusta Water is subject in all respects to the jurisdiction of the Department of Environmental Quality - Water Division (DEQ), formerly the State Water Control Board of Virginia, under the provisions of the State Water Control Law.

Augusta Water also serves as the operator and fiscal agent for the Augusta Regional Landfill (Landfill), a hybrid joint-venture and undivided interest between the Cities of Waynesboro and Staunton and the County of Augusta. This relationship was first formalized with a Contract for Sanitary Landfill Operation on December 11, 1970 with the City of Staunton (Staunton) and the County. Two additional agreements were signed in 1990 and 1999 as the Landfill expanded and the City of Waynesboro joined as an owner. On May 6, 2006 a Landfill Management Agreement was signed by the owner localities and reaffirmed on December 31, 2015 to formalize the continuing utilization of Augusta Water as both operators and fiscal agents for the Landfill. Financial transactions of the Landfill are not included in these financial statements except as a custodial fund.

A. Determination of the Reporting Entity

Augusta County has determined Augusta Water is a related organization but not a component unit of the County in accordance with Governmental Accounting Standards Board (GASB) Statements 14 and 61. Augusta Water is a legally separate organization whose Board members are appointed by the County Board of Supervisors. During the year ended June 30, 2023, one member of the Board of Supervisors was also a member of the seven-member Augusta Water Board. The County considered the following in their determination: Under GASB Statement No. 14 Augusta Water was included in the financial statements as a blended component unit when the governing boards of the two entities were substantially the same. GASB Statement No. 61 requires that the governing boards be substantially the same and a financial benefit and/or burden relationship must be present or the management staff of the primary government and the component unit be substantially the same. The relationship between the County and Augusta Water does not create a financial benefit and/or burden on the County, and the management staffs of the two organizations are separate from one another.

Note 1–Significant Accounting Policies: (Continued)

B. Basic Financial Statements

Since Augusta Water is engaged in business-type activities, it is required to present the financial statements required for enterprise funds. Fiduciary (custodial) fund statements are also required for the Landfill since these funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations. Therefore, the basic financial statements and required supplementary information consist of:

- Management's discussion and analysis
- Enterprise fund financial statements
 - Statements of Net Position
 - Statements of Revenues, Expenses and Changes in Net Position
 - Statements of Cash Flows
- · Statement of Fiduciary Net Position
- Statement of Changes in Fiduciary Net Position
- Notes to Financial Statements
- Required Supplementary Information

C. Basis of Accounting

Augusta Water operates as an enterprise activity. Augusta Water's enterprise (proprietary) fund financial statements are reported using the economic resources measurement focus. Proprietary and fiduciary fund financial statements are reported using the accrual basis of accounting. Under this method, revenues are recognized when earned, and expenses are recorded as liabilities when incurred, without regard to receipt or payment of cash. Nonexchange transactions, in which Augusta Water gives (or receives) value without directly receiving (or giving) equal value in exchange, include availability fees (fees assessed new customers or developers for the cost of water or wastewater system capacity), grants, and donations. Revenue from availability fees, grants and donations are recognized in the fiscal year in which all eligibility requirements have been satisfied. Augusta Water accrues revenue for services rendered but not yet billed at the end of the fiscal year. Augusta Water follows all applicable GASB pronouncements.

Augusta Water distinguishes operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with Augusta Water's principal ongoing operations. The principal operating revenues of Augusta Water are charges to customers for sales and services. Augusta Water also recognizes as operating revenue the portion of new connection charges intended to recover the cost of connecting new customers to the system (hook-up fees). Operating expenses include the cost of sales and services, administrative expenses, and depreciation and amortization on capital assets. All revenues and expenses not meeting these definitions are reported as nonoperating revenues and expenses.

D. Cash and Cash Equivalents

Augusta Water's cash and cash equivalents consist of cash on hand, demand deposits and certificates of deposit.

Note 1–Significant Accounting Policies: (Continued)

E. Restricted Assets

Certain proceeds of Augusta Water's revenue bonds, as well as certain resources set aside for repayment, are classified as restricted assets on the Statements of Net Position and are limited by applicable bond covenants.

Master Trust Indenture Title	Description	June 30, 2023	June 30, 2022
Revenue bond general operating revenue	Used to report resources set aside to subsidize potential deficiencies from the Authority's operation that could \$ adversely affect debt service payments. Required minimum level of 1/6 of annual operating expense budget (less depreciation).	2,607,187 \$	2,361,648
Repair and replacement reserve	Used to report resources set aside to meet unexpected contingencies or to fund asset renewals and replacements.	500,000 3,107,187 \$	500,000 2,861,648

F. Intergovernmental Receivables and Payables

The details of the intergovernmental receivables and payable are shown below:

		June 30,	June 30,
Asset or Liability Item and Description		2023	2022
Intergovernmental receivable			
- Due from the Landfill for accrued payables	\$	268,643 \$	301,266
- Due from state agencies for nutrient credits and operational costs		-	3,641
- Due from Staunton for operational and minor capital costs at the			
Middle River Regional WWTP and Staunton wholesale sewer		388,904	347,019
- Due from Augusta County for fuel charges, Greenville Sewer			
reimbursement, Mill Place water tank and other projects		44,489	85,584
- Due from Waynesboro for wholesale water		2,009	1,983
- Due from Craigsville for wholesale water		15,105	-
- Due from other governments for shared operations or wholesale			
consumption		5,124	2,025
	\$	724,274 \$	741,518
Intergovernmental payable	_		
- Due to Augusta County for Greenville Sewer reimbursement and	_		
operational costs	\$	18,887 \$	34,195
- Due to Staunton for wholesale water consumption, laboratory charges			
and nutrient credits		144,553	161,504
- Due to Waynesboro for wholesale water		52,328	49,883
- Due to the Landfill for accrued payables		517	541
	\$	216,285 \$	246,123

Note 1–Significant Accounting Policies: (Continued)

G. Capital Assets

Capital assets, which include intangibles, property, plant, equipment, and infrastructure assets (e.g., sewer lines and water tanks), are reported in the financial statements. Capital assets are defined by Augusta Water as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at acquisition value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed, by Augusta Water policy, with an anticipated project minimum threshold of \$1 million constructed over more than one year.

Capital assets are depreciated or amortized using the straight-line method over the following estimated useful lives:

Assets	Years	
Utility infrastructure	50 to 66	
Buildings	66	
Equipment	5 to 30	
Intangible assets: software	5	
Vehicles and transportation equipment	5	
Office furniture and fixtures	10	
Intangible right-to-use lease assets	1 to 5	

When, in the opinion of management, certain assets are impaired, any estimated decline in value is accounted for as a non-operating expense. There were no impaired assets as of June 30, 2023.

H. <u>Leases</u>

Lesse: For new or modified contracts, Augusta Water determines whether the contract is a lease. If a contract is determined to be, or contain, a lease with a non-cancellable term in excess of 12 months (including any options to extend or terminate the lease when exercise is reasonably certain), Augusta Water records a lease asset and lease obligation which is calculated based on the value of the discounted future lease payments over the term of the lease. If the interest rate implicit in the lease is not readily determinable, Augusta Water will use the applicable incremental borrowing rate in the calculation of the present value of the lease payments.

Augusta Water is a lessee for non-cancellable leases of copiers, mail machines and towers. Augusta Water recognizes a lease liability and intangible right-to-use lease asset on the Statement of Net Position. Leases with an initial, non-cancellable term of 12 months or less are not recorded on the Statement of Net Position and expense is recognized as incurred over the lease term. At the commencement of a lease, Augusta Water measures the lease liability at the present value of payments expected to be made during the lease term and then reduces the liability by the principal

Note 1–Significant Accounting Policies: (Continued)

portion of lease payments made. The lease asset is measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs, then amortized on a straight-line basis over a period that is the shorter of the lease term or the useful life of similar capital assets. Lease payments are apportioned between interest expense and principal based on an amortization schedule calculated using the effective interest method.

Lessor: For new or modified contracts, Augusta Water determines whether the contract is a lease. If a contract is determined to be, or contain, a lease with a non-cancellable term in excess of 12 months (including any options to extend or terminate the lease when exercise is reasonably certain), Augusta Water records a lease receivable and a deferred inflow of resources which is calculated based on the value of the discounted future lease payments over the term of the lease. If the interest rate implicit in the lease is not clear, Augusta Water may apply the guidance for imputation of interest as a means of determining the interest rate.

Augusta Water will not recognize a lease receivable and a deferred inflow of resources for leases with a non-cancellable term of less than 12 months, and income is recognized as incurred.

At the commencement of a lease, Augusta Water measures the lease receivable as the present value of payments expected to be received during the lease term and reduces the receivable by the principal portion of lease payments received after satisfaction of accrued interest on the lease receivable, calculated using the effective interest method. The deferred inflow of resources is measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date, then recognized on a straight-line basis as revenue over the lease term.

I. Compensated Absences

Augusta Water employees earn vacation and sick leave each month at a scheduled rate in accordance with the years of service. Accumulated unpaid vacation and other compensatory leave amounts are accrued when incurred. Sick leave vests at twenty-five percent of the value with a cap of 1,040 hours. The vested amount is recorded as a liability in the financial statements.

J. Other Significant Accounting Policies

- Accounts receivable are recorded when billed. Augusta Water utilizes the direct write-off method
 for uncollectible accounts. Uncollected balances have not been significant and no allowance for
 uncollectible accounts is recorded.
- Unbilled Accounts Receivable: Augusta Water uses the cycle method of billing customers for services. Under this method, customer billings are made by specified cycles established for the service area and each cycle billed during a specific week every other month. For financial statement purposes, actual billings made in July and August are prorated for services provided for the months of May and June and included as an unbilled receivable.
- Investments are stated at fair value. Investments in the Local Government Investment Pool are reported in the accompanying financial statements as cash equivalents since their average maturity may not exceed 90 days.

NOTES TO FINANCIAL STATEMENTS

Note 1–Significant Accounting Policies: (Continued)

 Inventories of materials and supplies are stated at cost using the first-in, first-out method of valuation.

K. Deferred Outflows/Inflows of Resources

In addition to assets, the Statement of Net Position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to future periods and so will not be recognized as an outflow of resources (expenditure) until then. Augusta Water currently has several items that qualify for reporting in the category. See Notes 8, 9 & 10 for details regarding these items.

In addition to liabilities the Statement of Net Position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to future periods and so will not be recognized as an inflow of resources (revenue) until that time. Augusta Water currently has several items that qualify for reporting in the category. See Notes 8, 9 & 10 for details regarding these items.

L. Other Post-Employment Benefits-Health Care

The Health Care Plan is a single-employer plan. Differences between expected and actual experience and actuarial assumptions are amortized over the average of the expected remaining service lives of all employees that covered through this plan, which is 6.49 years. Plan amendments are recognized immediately.

M. Group Life Insurance

The Virginia Retirement System (VRS) Group Life Insurance Program is a multiple employer, cost sharing plan. It provides coverage to state employees, teachers, and employees of participating political subdivisions. The Group Life Insurance Program was established pursuant to §51.1-500 et seq. of the *Code of Virginia*, as amended, and which provides the authority under which benefit terms are established or may be amended. The Group Life Insurance Program is a defined benefit plan that provides a basic group life insurance benefit for employees of participating employers. For purposes of measuring the net Group Life Insurance Program OPEB liability, deferred outflows of resources and deferred inflows of resources related to the Group Life Insurance Program OPEB, and Group Life Insurance Program OPEB expense, information about the fiduciary net position of the VRS Group Life Insurance program OPEB and the additions to/deductions from the VRS Group Life Insurance Program OPEB's net fiduciary position have been determined on the same basis as they were reported by VRS. In addition, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

N. Pensions

For purposes of measuring the net pension asset or liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Virginia Retirement System (VRS) Augusta Water Retirement Plan and the additions to/deductions from the VRS Augusta Water Retirement Plan net fiduciary position have been determined on the same basis as they were reported by VRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

NOTES TO FINANCIAL STATEMENTS

Note 1-Significant Accounting Policies: (Continued)

O. Net Position

Net position represents the difference between assets and liabilities. Net investment in capital assets consists of capital assets, net of accumulated depreciation and amortization, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net investment in capital assets, net of related liabilities excludes unspent debt proceeds. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by Augusta Water or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The Authority first applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets were available.

P. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Q. Reclassification

Certain prior year amounts have been reclassified in the Statement of Net Position for consistency with the current year presentation. These reclassifications had no effect on the reported results of operations.

R. Subsequent Events

Augusta Water has evaluated subsequent events through December 7, 2023, which was the date the financial statements were available to be issued.

Note 2-Deposits and Investments:

Deposits

Deposits with banks are covered by the Federal Deposit Insurance Corporation (FDIC) and collateralized in accordance with the Virginia Security for Public Deposits Act (the "Act"), Section 2.2-4400 et., seq. of the *Code of Virginia*. Under the Act, banks and savings institutions holding public deposits in excess of the amount insured by the FDIC must pledge collateral to the Commonwealth of Virginia Treasury Board. Financial institutions may choose between two collateralization methods and depending upon that choice, will pledge collateral that ranges in the amounts from 50% to 130% of excess deposits. Accordingly, all deposits are considered fully collateralized.

Custodial Credit Risk (Deposits)

This is the risk that in the event of a bank failure, Augusta Water's deposits may not be returned to Augusta Water. Augusta Water requires all deposits to comply with the Virginia Security for Public Deposits Act. At year end, none of Augusta Water's deposits were exposed to custodial credit risk.

NOTES TO FINANCIAL STATEMENTS

Note 2-Deposits and Investments: (Continued)

<u>Investments</u>

Statutes authorize local governments and other public bodies to invest in obligations of the United States or its agencies thereof, obligations of the Commonwealth of Virginia or political subdivisions thereof, obligations of the International Bank for Reconstruction and Development (World Bank), the Asian Development Bank, the African Development Bank, "prime quality" commercial paper and certain corporate notes; bankers' acceptances, repurchase agreements and the State Treasurer's Local Government Investment Pool (LGIP).

Augusta Water has investments in the LGIP. The LGIP is a professionally managed money market fund which invests in qualifying obligations and securities as permitted by Virginia statutes. Pursuant to Section 2.2-4605 *Code of Virginia*, the Treasury Board of the Commonwealth sponsors the LGIP and has delegated certain functions to the State Treasurer. The LGIP reports to the Treasury Board at their regularly scheduled monthly meetings. Investments in the LGIP are stated at amortized cost and classified as cash and cash equivalents. The fair value of the LGIP is the same as the value of the pool shares, i.e., the LGIP maintains a stable net asset value of \$1 per share. The LGIP has been assigned an "AAAm" rating by Standard & Poor's. The maturity of the LGIP is less than one year. Investments in LGIP are reflected in the accompanying financial statements as cash equivalents.

Custodial Credit Risk (Investments)

Augusta Water's investment policy provides that securities purchased for Augusta Water shall be held by the Augusta Water Treasurer or by the Treasurer's custodian. If held by a custodian, the securities must be in Augusta Water's name or in the custodian's nominee name and identifiable on the custodian's books as belonging to Augusta Water. Further, if held by a custodian, the custodian must be a third-party, not a counterpart (buyer or seller) to the transaction. At June 30, 2023 all of Augusta Water's investments were held in accordance with this policy.

Credit Risk (Investments)

Augusta Water's investment policy for credit risk is consistent with the investments allowed by state statute as detailed above.

Augusta Water's rated debt investments as of June 30, 2023 were rated by Standard and Poor's and the ratings are presented below using the Standard & Poor's rating scale.

Authority's Rated Investments' Values							
		Fair Quality Ratings					
	_	AAAm					
LGIP LGIPcustodial fund	\$	6,655,138 7,276,174					
Money Market Mutual Fund		4,568,947					
Total	\$_	18,500,259					

NOTES TO FINANCIAL STATEMENTS

Note 2-Deposits and Investments: (Continued)

Concentration of Credit Risk

Augusta Water's investment policy limits the investment in bankers' acceptances to 40% of total funds available for investment. Not more than 35% of Augusta Water's total investments may be in commercial paper and not more than 5% in the obligations of any one issuer in commercial paper. At June 30, 2023 all of Augusta Water's investments were held in accordance with this policy.

Interest Rate Risk

Interest rate risk is defined as the risk that changes in interest rates will adversely affect the fair value of an investment. As a means of limiting exposure to fair value losses arising from increasing interest rates and to comply with the laws of the Commonwealth, Augusta Water's policy limits the investment of funds to investments with a stated maturity of no more than five years from the date of purchase. Interest rate risk does not apply to LGIP since it is an external investment pool classified in accordance with GASB Statement No. 79.

	Fair Value	Less Than 1 Year		
LGIP LGIP-Custodial Fund Certificates of deposit Money Market Mutual Fund	\$ 6,655,138 7,276,174 1,792,282 4,568,947	\$ 6,655,13 7,276,17 1,792,28 4,568,94	74 32	

Augusta Water categorizes its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; and Level 3 inputs are significant unobservable inputs.

The Authority has the following recurring fair value measurements as of June 30, 2023:

- Certificates of deposit in the amount of \$1,792,282 are valued using quoted market prices (Level 1 inputs).
- Money market in the amount of \$4,568,947 are valued using quoted market prices (Level 1 inputs).

Note 3–Capital Assets and Depreciation/Amortization:

Effective July 1, 1968, Augusta Water adopted an accounting system to facilitate financial reporting on a basis generally used by municipally owned facilities. The previous accounting system which was prescribed by the Auditor of Public Accounts, Commonwealth of Virginia, for use in the counties of Virginia did not provide for the reporting of utility plant in service. Thus, it became necessary for Augusta Water to reconstruct its "capital outlay" expenditures for prior years and to place a value on property contributions from the County in order to fairly record and present the capital asset in service.

Note 3-Capital Assets and Depreciation/Amortization: (Continued)

The following method was used to value the property contributed by the County at July 1, 1966 and July 1, 1978. Actual costs of these facilities were obtained from the audited financial reports of the County. Replacement cost less depreciation was determined by appreciating actual costs at the rate of 5% per year and depreciating actual costs at the rate of 2% per year. Subdivisions dedicated to the County or Augusta Water were computed on a basis of pipe size, footage and estimated costs of fittings to arrive at a value at the date of acquisition.

Under this method of valuation, a total adjusted value of over \$5.3 million was obtained by Augusta Water by lease-purchase in consideration of the Authority's assumption of Sanitary District bonded debt in the amount of approximately \$1.1 million. The difference of \$4.2 million was recorded as a contribution in aid of construction.

Both the \$1.7 million cost of assets acquired by Augusta Water from the date of its inception to June 30, 1968 and the value of aforementioned assets contributed by the County have been distributed to the various capital asset accounts at the discretion of management. Since July 1, 1968, all additions to plant have been recorded in capital asset accounts.

A summary of changes in capital assets for the current and prior year follows:

	_	Balance July 1, 2022	Additions	Disposals	Transfers	Balance June 30, 2023
Capital assets not being depreciated:

Note 4–Construction in Progress:

Augusta Water has a number of uncompleted construction projects shown as an asset, Construction in Progress, at June 30, 2023 and 2022. Presented below are tables of the major categories of projects showing the expenses, transfers of completed projects to asset or expense accounts and the ending balances of each project at year end for the current and prior year:

Note 5-Leases:

Augusta Water is a lessee for leases of copiers, mail machines and towers. Most leases have terms that range from 1 to 5 years. The exercise of lease renewal options is at Augusta Water's discretion. Augusta Water monitors changes in circumstances that would require a re-measurement of a lease and will remeasure the lease asset and liability if changes occur that are expected to significantly affect the amount of the lease liability.

Key estimates and judgements related to leases include the determination of a discount rate, lease term, lease payments, and residual value guarantees or other provisions as follows:

Discount Rate	en readily available or easily determinable, Augusta Water uses the interest e charged by the lessor. If not readily available or easily determinable, gusta Water uses its estimated incremental borrowing rate.					
Lease Term	The lease term includes the non-cancellable period of the lease.					
Lease Payments	Lease payments included in the measurement of the lease liability are comprised of fixed payments and, if applicable, the purchase option price Augusta Water is reasonably certain to exercise.					

Lease assets are reported with other capital assets and lease liabilities are reported with current and noncurrent liabilities on the Statement of Net Position.

Note 5-Leases: (Continued)

Details of leases in which Augusta	Water is the lessee are as follows:
------------------------------------	-------------------------------------

Details of leases in which Augusta Water is the lessee are as follows:	Remaining Principal
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$187 through July 2026. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$10,383 during fiscal year 2022. The copier has an estimated useful life of forty-nine months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$6,403 and had accumulated amortization of \$3,980.	\$ 6,586
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$176 through August 2026. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$9,776 during fiscal year 2022. The copier has an estimated useful life of fifty months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$6,192 and had accumulated amortization of \$3,585.	6,361
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$125 through December 2026. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$6,979 during fiscal year 2022. The copier has an estimated useful life of fifty-four months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$4,886 and had accumulated amortization of \$2,094.	4,994
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$163 through February 2025. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$6,797 during fiscal year 2022. The copier has an estimated useful life of thirty-two months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$3,090 and had accumulated amortization of \$3,708.	3,182
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$192 through August 2024. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$6,934 during fiscal year 2022. The copier has an estimated useful life of twenty-six months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$2,555 and had accumulated amortization of \$4,379.	2,632
Lease obligation for a copier. Augusta Water is required to make monthly principal and interest payments of \$145 through February 2025. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$5,237 during fiscal year 2022. The copier has an estimated useful life of twenty-six months. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$1,929 and had accumulated amortization of \$3,308.	1,988
Lease obligation for a tower lease. Augusta Water is required to make monthly principal and interest payments ranging from \$1,815 to \$2,156 through July 2027. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$12,096 during fiscal year 2022. The tower lease has an estimated useful life of six years. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$8,640 and had accumulated amortization of \$3,456.	9,210

NOTES TO FINANCIAL STATEMENTS

Note 5-Leases: (Continued)

Lease obligation for a tower lease. Augusta Water is required to make monthly principal and interest payments of \$2,548 through December 2024. The lease has an interest rate of 3.00%. An initial lease liability was recorded in the amount of \$9,471 during fiscal year 2022. The tower lease has an estimated useful life of three years. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$4,736 and had accumulated amortization of \$4,736.

\$ 4,876

Lease obligation for a mail machine. Augusta Water is required to make quarterly principal and interest payments of \$2,504 through July 2027. The lease has an interest rate of 5.00%. An initial lease liability was recorded in the amount of \$44,060 during the current fiscal year. The mail machine lease has an estimated useful life of five years. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$37,451 and had accumulated amortization of \$6,609.

38,128

Lease obligation for a copier. Augusta Water is required to make quarterly principal and interest payments of \$479 through February 2028. The lease has an interest rate of 5.00%. An initial lease liability was recorded in the amount of \$25,370 during the current fiscal year. The copier lease has an estimated useful life of five years. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$23,679 and had accumulated amortization of \$1,692.

23,868

Lease obligation for a copier. Augusta Water is required to make quarterly principal and interest payments of \$139 through January 2027. The lease has an interest rate of 5.00%. An initial lease liability was recorded in the amount of \$7,380 during the current fiscal year. The copier lease has an estimated useful life of five years. The value of the intangible right-to-use lease asset as of the end of the current fiscal year was \$5,289 and had accumulated amortization of \$2,091.

2028	8,325	165
Total minimum lease payments	\$ 107,297 \$	10,053

Augusta Water is a lessor for a lease related to a communication tower. The lease term is for 20 years. The exercise of lease renewal options is at Augusta Water's discretion. Augusta Water monitors changes in circumstances that would require a re-measurement of a lease and will re-measure the lease receivable and related deferred inflows of resources if changes occur that are expected to significantly affect the amount of the lease receivable. Augusta Water will receive monthly payments ranging from \$2,852 to \$3,507 through October 2029. An initial lease receivable was recorded in the amount of \$277,300.

NOTES TO FINANCIAL STATEMENTS

Note 5-Leases: (Continued)

Augusta Water is a lessor for a lease related to a communication tower. The lease term is for five years. The exercise of lease renewal options is at Augusta Water's discretion. Augusta Water monitors changes in circumstances that would require a re-measurement of a lease and will re-measure the lease receivable and related deferred inflows of resources if changes occur that are expected to significantly affect the amount of the lease receivable. Augusta Water will receive monthly payments ranging from \$14,400 to \$16,207 through February 2027. An initial lease receivable was recorded in the amount of \$66,008.

Augusta Water has a deferred inflow of resources associated with its leases that will be recognized as revenue over the term of the leases. As of June 30, 2023, the balance of the deferred inflow was \$263,555. Lease revenue for the year ended June 30, 2023 was \$46,478 and lease interest income for the same year was \$10,466.

Future minimum lease amounts as of June 30, 2023 are as follows:

Year(s) Ending June 30,		Interest	
2024	\$	41,729 \$	9,053
2025		44,773	7,532
2026		47,976	5,898

Note 7-Compliance with Terms of Bond Resolution (2015 Refunding Issue):

Debt Service Coverage

Revenues for the fiscal year ended June 30, 2023 were adequate for the payment of operating expenses and satisfied the revenue covenant of the bond issue. The amount available for debt service was 2.92 times the actual debt service for the fiscal year, including service of long-term lease obligations and principal and interest on other debt service.

Events of Default

No event has occurred that would constitute an event of default under the terms of the 2015 Refunding Revenue Bonds and supplementary indentures of trust of the original 1994 bond issue.

Note 8-Other Postemployment Benefits-Health Insurance:

Augusta Water participates in a defined benefit single-employer health plan and Augusta Water employees are eligible for a limited amount of post-employment health and dental benefits as defined in Augusta Water's Board-approved Personnel Policy Manual. An actuarial study was conducted in fiscal year 2021 for future direct and implicit costs amortized over 6.49 years.

GASB Statement 75 addressed how local governments should account for and report their costs related to post-employment health care and other non-pension benefits. Historically, Augusta Water funded any retiree health benefit subsidies on a pay-as-you-go basis but GASB Statement 75 required Augusta Watery accrue the cost of the retiree health subsidy and other post-employment benefits during the period of employees' active employment, while the benefits are earned, and record the unfunded actuarial accrued liability in order to account for the total future cost of post-employment benefits. This funding methodology mirrors the funding approach used for pension benefits.

A. Plan Description

Augusta Water administers a single-employer defined benefit healthcare plan that provides healthcare insurance for eligible retirees and their dependents through Augusta Water's group health insurance plan, which covers both active and retired members. Retirees who have five or more years of service with Augusta Water and are age 55 or older with full or reduced retirement benefits from the VRS Retirement System are eligible to remain in the healthcare plan at the blended premium rate with a \$2,500 per year maximum subsidy (paid by Augusta Water) until they are eligible for Medicare or unsubsidized when Medicare is available. Retirees and terminated employees can also elect COBRA coverage for up to eighteen months if previously enrolled in Augusta Water's health or dental insurance plans.

NOTES TO FINANCIAL STATEMENTS

Note 8-Other Postemployment Benefits-Health Insurance: (Continued)

Eligible employees must elect coverage immediately upon retirement. Employees who terminate prior to retirement eligibility are not eligible for the health insurance. Dependents, including surviving spouses, are permitted access to medical coverage also. As of the end of the current fiscal year, there was retiree who participated in Augusta Water's group insurance plan.

The plan does not issue a publicly available financial report. The contribution requirements of plan members are established and may be amended by the Authority's Board of Directors.

There are not assets accumulated in a trust that meets the criteria of GASB codification P22.101 or P52.101 to pay related benefits for the OPEB plan.

As of the June 30, 2023 actuarial valuation, the following employees were covered by the benefit terms:

	Number
Active members Inactive members or beneficiaries	107
currently reveiving benefits	4
Total covered employees	111

B. Total OPEB Liability (TOL)

The Authority's OPEB liability was measured as of June 30, 2023, and the total OPEB Liability was determined by an actuarial valuation as of July 1, 2022.

Actuarial Assumptions

The total OPEB liability in the July 1, 2022 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Salary Increases 2.50% Discount rate* 3.69%

Healthcare trend costs 5.75% for fiscal year 2023, decreasing 0.25% per year to an ultimate rate of

5.00%

Mortality Rates RP-2014 Fully Generational Mortality Table, with base year 2006, using two-

dimensional mortality improvement scale MP-2021

^{*} Discount rates used to measure TOL were based on the Municipal GO AA 20-year yield curve as of the measurement date.

Note 8-Other Postemployment Benefits-Health Insurance: (Continued)

Balance at June 30, 2023	\$_	516,176

Sensitivity of the total OPEB liability to changes in the discount rate.

The following presents Augusta Water's Total OPEB Liability, calculated using the discount rate of 3.69%. It also presents what Augusta Water's Total OPEB Liability would be if it were calculated using a discount rate one percentage point lower (2.69%) and one percentage point higher (4.69%) than the current rate.

	1	% Decrease	Cui	rent Discount	1% Increase	
		(2.69%)	F	ate (3.69%)	(4.69%)	
						_
Total OPEB Liability	\$	569,960	\$	516,176	\$ 469,862	

Sensitivity of the total OPEB liability to changes in the healthcare cost trend rate.

The following presents the Authority's Total OPEB Liability, calculated using the current healthcare trend rates. It also presents what the Authority's Total OPEB Liability would be if it were calculated using healthcare trend rates that are one percentage point lower or one percentage point higher than the current rate.

	1	% Decrease (4.75%)	 urrent Discount Rate (5.75%)	1% Increase (6.75%)	
Total OPEB Liability	\$	465,380	\$ 516,176	\$ 574,442	

Note 8-Other Postemployment Benefits-Health Insurance: (Continued)

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between expected and actual experience Changes of assumptions Employer contributions subsequent to the measurement date	\$ 165,437 107,238 20,429	\$ 105,086 309,992
Total	\$ 293,104	\$ 415,078

The \$20,429 reported as deferred outflows of resources related to the OPEB Health Insurance resulting from the employer's contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the fiscal year ending June 30, 2024. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the OPEB Health Insurance will be recognized in the OPEB Health Insurance expense in future reporting periods as follows:

Year Ending June 30		
2024	\$ (64,79	93)
2025	(58,62	26)
2026	(26,04	12)
2027	(12,07	71)
2028	19,12	29
	\$ (142,40)3)

The OPEB Health Care plan issues a stand-alone report that can be obtained by writing the Director of Finance of Augusta Water at P.O. Box 859, Verona, VA 24482 or by email at finance@augustawater.com.

Note 9-Group Life Insurance Program:

The Virginia Retirement System (VRS) Group Life Insurance Program is a multiple employer, cost sharing plan

A. Plan Description

All full-time, salaried permanent employees of Augusta Water are automatically covered by the VRS Group Life Insurance Program (GLI) upon employment. This plan is administered by the Virginia Retirement System (the System), along with pensions and other OPEB plans, for public employer groups in the Commonwealth of Virginia.

In addition to the Basic GLI benefit, members are also eligible to elect additional coverage for themselves as well as a spouse or dependent children through the Optional GLI program. For members who elect the optional GLI coverage, the insurer bills employers directly for the premiums. Employers deduct these premiums from the members' paychecks and pay the premiums to the insurer. Since this is a separate and fully insured program, it is not included as part of the GLI Program OPEB.

Note 9–Group Life Insurance Program: (Continued)

The specific information for GLI Program OPEB, including eligibility, coverage and benefits is set out in the table below:

GROUP LIFE INSURANCE PROGRAM PLAN PROVISIONS

Eligible Employees

The GLI was established July 1, 1960, for state employees, teachers and employees of political subdivisions that elect the program.

Basic GLI coverage is automatic upon employment. Coverage ends for employees who leave their position before retirement eligibility or who take a refund of their accumulated retirement member contributions and accrued interest.

Benefit Amounts

The benefits payable under the GLI have several components.

- Natural Death Benefit The natural death benefit is equal to the employee's covered compensation rounded to the next highest thousand and then doubled.
- Accidental Death Benefit The accidental death benefit is double the natural death benefit.
- Other Benefit Provisions In addition to the basic natural and accidental death benefits, the program provides additional benefits provided under specific circumstances. These include:
 - Accidental dismemberment benefit
 - Seatbelt benefit
 - Repatriation benefit
 - Felonious assault benefit
 - Accelerated death benefit option

Reduction in Benefit Amounts

The benefit amounts provided to members covered under the GLI are subject to a reduction factor. The benefit amount reduces by 25% on January 1 following one calendar year of separation. The benefit amount reduces by an additional 25% on each subsequent January 1 until it reaches 25% of its original value.

Minimum Benefit Amount and Cost-of-Living Adjustment (COLA)

For covered members with at least 30 years of service credit, there is a minimum benefit payable under GLI. The minimum benefit was set at \$8,000 by statute in 2015. This amount is increased annually based on the VRS Plan 2 COLA calculation. The minimum benefit adjusted for COLA was \$8,984 as of June 30, 2023.

B. Contributions

The contribution requirements for the GLI are governed by Sections 51.1-506 and 51.1-508 of the *Code of Virginia*, as amended, but may be impacted as a result of funding provided to state agencies and school divisions by the Virginia General Assembly. The total rate for the GLI was 1.34% of covered employee compensation. This was allocated into an employee and an employer component using a 60/40 split. The employee component was 0.80% (1.34% X 60%) and the employer component was 0.54% (1.34% X 40%). Employers may elect to pay all or part of the employee contribution, however, the employer must pay all of the employer contribution. Each employer's contractually required employer contribution rate for the year ended June 30, 2023 was 0.54% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as

Note 9–Group Life Insurance Program: (Continued)

of June 30, 2021. The actuarially determined rate, when combined with employee contributions, was expected to finance the costs of benefits payable during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the GLI from Augusta Water were \$33,178 and \$28,894 for the years ended June 30, 2023 and June 30, 2022, respectively.

In June 2022, the Commonwealth make a special contribution of \$30.4 million to the GLI plan. The special payment was authorized by a Budget Amendment included in Chapter 1 of the 2022 Appropriation Act.

C. <u>GLI OPEB Liabilities, GLI OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to the Group Life Insurance Program OPEB</u>

At June 30, 2023, Augusta Water reported a liability of \$289,960 for its proportionate share of the net GLI OPEB liability. The net GLI OPEB liability was measured as of June 30, 2022 and the total GLI OPEB liability used to calculate the net GLI OPEB liability was determined by an actuarial valuation performed as of June 30, 2021 and rolled forward to the measurement date of June 30, 2022. The covered employer's proportion of the net GLI OPEB liability was based on the covered employer's actuarially determined employer contributions to the GLI for the year ended June 30, 2022 relative to the total of the actuarially determined employer contributions for all participating employers. At June 30, 2022, the participating employer's proportion was \$289,960 or 0.02408% as compared to \$280,738 or 0.02411% at June 30, 2021.

For the year ended June 30, 2023, Augusta Water recognized GLI OPEB expense of \$9,512. Since there was a change in the proportionate share between measurement dates, a portion of the GLI OPEB expense was related to deferred amounts from changes in proportion.

At June 30, 2023, the employer reported deferred outflows of resources and deferred inflows of resources related to the GLI OPEB from the following sources:

	(Deferred Outflows Resources	of	Deferred Inflows Resources
Difference between expected and actual experience	\$	23,201	\$	11,755
Net difference between projected and actual earnings on				
GLI OPEB program investments		-		18,308
Changes of assumptions		10,928		28,539
Changes in proportion		2,216		6,912
Employer contributions subsequent to the measurement date		33,178		
Total	\$	69,523	\$	65,514

The information above is derived from the actuarial valuation report for Augusta Water. Augusta Water has recorded a net GLI OPEB liability of \$289,960 on its Statements of Net Position based on a percentage of contributions to the plan for fiscal years 2014-2022. Augusta Water's percentage of total contributions to the plan was 88.42 percent. This percentage was used to allocate a portion of the net GLI OPEB liability to Augusta Water.

Note 9–Group Life Insurance Program: (Continued)

The \$33,178 reported as deferred outflows of resources related to the GLI OPEB resulting from the employer's contributions subsequent to the measurement date will be recognized as a reduction of the net GLI OPEB liability in the fiscal year ending June 30, 2024. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the GLI OPEB will be recognized in the GLI OPEB expense in future reporting periods as follows:

Year Ended June 30	
2024	\$ (5,832)
2025	(5,832)
2026	(5,832)
2027	(5,832)
2028	(5,841)
	\$ (29,169)

D. Actuarial Assumptions

The total GLI OPEB liability was based on an actuarial valuation as of June 30, 2021, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2022.

Inflation 2.5%

Salary increases, including inflation:

Locality – general employees 3.5%-5.35%

Investment rate of return 6.75%, net of plan investment expenses, including

inflation

Mortality Rates - Largest 10 Locality Employers - General Employees

Pre-Retirement: Pub-2010 Amount Weighted Safety Employee Rates projected generationally; males set forward 2 years; 105% of rates for females set forward 3 years.

Post-Retirement: Pub-2010 Amount Weighted Safety Healthy Retiree Rates projected generationally; 95% of rates for males set forward 2 years; 95% of rates for females set forward 1 year.

Post-Disablement: : Pub-2010 Amount Weighted General Disabled Rates projected generationally; 110% of rates for males set forward 3 years; 110% of rates for females set forward 2 years.

Beneficiaries and Survivors: : Pub-2010 Amount Weighted Safety Contingent Annuitant Rates projected generationally; 110% of rates for males and females.

Mortality Improvement Scale: Rates projected generationally with Modified MP-2020 Improvement Scale that is 75% of the MP-2020 rates.

Note 9–Group Life Insurance Program: (Continued)

The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period from July 1, 2016 through June 30, 2020, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Mortality Rates (pre-retirement, post- retirement healthy, and disabled)	Updated to PUB2010 public sector mortality tables. For future mortality improvements, replace load with a modified Mortality Improvement Scale MP-2020
Retirement Rates	Adjusted rates to better fit experience for Plan 1; set separate rates based on experience for Plan 2/Hybrid; changed final retirement age from 75 to 80 for all
Withdrawal Rates	Adjusted rates to better fit experience at each age and service decrement through 9 years of service
Disability Rates	No change
Salary Scale	No change
Discount Rate	No change

E. Net GLI OPEB Liability

The net OPEB liability (NOL) for the GLI represents the program's total OPEB liability determined in accordance with GASB Statement No. 74, less the associated fiduciary net position. As of the measurement date of June 30, 2022, NOL amounts for the GLI is as follows (amounts expressed in thousands):

	GLI OPEB Program
Total GLI OPEB liability Plan fiduciary net position	\$ 3,672,085 2,467,989
Employers' net GLI OPEB liability	\$ 1,204,096
Plan fiduciary net position as a percentage of the total GLI OPEB liability	67.21%

The total GLI OPEB liability is calculated by the System's actuary, and each plan's fiduciary net position is reported in the System's financial statements. The net GLI OPEB liability is disclosed in accordance with the requirements of GASB Statement No. 74 in the System's notes to the financial statements and required supplementary information.

Note 9–Group Life Insurance Program: (Continued)

F. Long-Term Expected Rate of Return

The long-term expected rate of return on the System's investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of System's investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

			Weighted
		Arithmetic	Average
		Long-Term	Long-Term
	Target	Expected	Expected
Asset Class (Strategy)	Allocation	Rate of Return	Rate of Return
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00% 6.55		0.20%
Total	100.00%	=	5.33%
		Inflation_	2.50%
	*Expected arithm	etic nominal return _	7.83%

^{*}The above allocation provides a one-year return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the System, stochastic projections are employed to model future returns under various economic conditions.

G. Discount Rate

The discount rate used to measure the total GLI OPEB liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employer contributions will be made in accordance with the VRS funding policy and at rates equal to the actuarially determined contribution rates adopted by the VRS Board of Trustees. Through the fiscal year ending June 30, 2022, the rate contributed by the Landfill for the VRS GLI OPEB will be subject to the portion of the VRS Board-certified rates that are funded by the Virginia General Assembly, which was 100% of the actuarially determined contribution rate. From July 1, 2022 on, employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the GLI OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of eligible employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total GLI OPEB liability.

^{**}On October 10, 2019, the VRS Board elected a long-term rate of 6.75% which is roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation at that time, providing a median return of 7.11%, including expected inflation of 2.50%.

Note 9–Group Life Insurance Program: (Continued)

H. <u>Sensitivity of the Landfill's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate</u>

The following presents VRE's proportionate share of the net GLI OPEB liability using the discount rate of 6.75%, as well as what VRE's proportionate share of the net GLI OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

		Current	
	1%	Discount	
	Decrease	Rate	1% Increase
	(5.75%)	(6.75%)	(7.75%)
Authority's proportionate share of the	·		
GLI net OPEB liability	\$ 421,926	\$ 289,960	\$ 183,314

I. Group Life Insurance Program Fiduciary Net Position

Detailed information about the GLI's Fiduciary Net Position is available in the separately issued VRS 2022 Comprehensive Annual Financial Report (Annual Report). A copy of the 2022 VRS Annual Report may be downloaded from the VRS website at waretire.org/pdf/publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, Virginia, 23218-2500.

Note 10-Pension Plan:

Name of Plan: Virginia Retirement System (VRS)

Identification of Plan: Agent Multiple-Employer Pension Plan

Administering Entity: Virginia Retirement System (System)

A. Plan Description

All full-time, salaried permanent employees of Augusta Water are automatically covered by VRS Retirement Plan upon employment. This plan is administered by the Virginia Retirement System (the System) along with plans for other employer groups in the Commonwealth of Virginia. Members earn one month of service credit for each month they are employed and for which they and their employer pay contributions to VRS. Members are eligible to purchase prior service, based on specific criteria as defined in the *Code of Virginia*, as amended. Eligible prior service that may be purchased includes prior public service, active military service, certain periods of leave, and previously refunded service.

The System administers three different benefit structures for covered employees – Plan 1, Plan 2, and Hybrid. Each of these benefit structures has a different eligibility criteria. The specific information for each plan and the eligibility for covered groups within each plan are available at:

- https://www.varetire.org/members/benefits/defined-benefit/plan1.asp,
- https://www.varetire.org/members/benefits/defined-benefit/plan2.asp,
- https://www.varetirement.org/hybrid.html.

Note 10-Pension Plan: (Continued)

B. Employees Covered by Benefit Terms (All Augusta Water employees including the Landfill)

As of the June 30, 2021 actuarial valuation, the following employees were covered by the benefit terms of the pension plan:

	Number
Retirees and Beneficiaries	71
Inactive Vested Members	14
Inactive Nonvested Members	27
Long Term Disability	0
Active Elsewhere in VRS	17
Total Inactive Members	129
Active Members	107
Total Covered Employees	236

The totals above are reflective of both Augusta Water and Landfill employees. Separate data is not available for each entity.

C. Contributions

The contribution requirement for active employees is governed by Section 51.1-145 of the *Code of Virginia*, as amended, but may be impacted as a result of funding options provided to political subdivisions by the Virginia General Assembly. Employees are required to contribute 5.00% of their compensation toward their retirement.

Augusta Water's contractually required contribution rate for the year ended June 30, 2023 was 5.45% for Plan 1, Plan 2 and the Hybrid Plan of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2021.

This rate, when combined with employee contributions, was expected to finance the costs of benefits earned by an employee during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the pension plan from the Authority were \$294,260 and \$317,165 for the years ended June 30, 2023 and June 30, 2022, respectively.

D. Net Pension Liability

The net pension liability (NPL) is calculated separately for each employer and represents that particular employer's total pension liability determined in accordance with GASB statement No. 68, less that employer's fiduciary net position.

Augusta Water's net pension liability was measured as of June 30, 2022. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation performed as of June 30, 2021, rolled forward to the measurement date of June 30, 2022.

Note 10-Pension Plan: (Continued)

E. Actuarial Assumptions

The total pension liability for the Authority's retirement plan was based on an actuarial valuation as of June 30, 2021, using the Entry Age Normal Actuarial cost method and the following assumptions, applied to periods included in the measurement and rolled forward to the measurement date of June 30, 2022.

Inflation 2.50%

Salary increases, including inflation 3.50% - 5.35%

Investment rate of return 6.75%, net of pension plan investment expense, including

inflation

Mortality Rates

- Pre-retirement Pub-2010 Amount Weighted Safety Employee Rates projected

generationally; 95% of rates for males; 105% of rates for females set forward

2 years.

- Post-retirement Pub-2010 Amount Weighted Safety Healthy Retiree Rates projected

generationally;110% of rates for males; 105% of rates for females set

forward 3 years.

- Post-disablement Pub-2010 Amount Weighted General Disabled Rates projected

generationally; 95% of rates for males set back 3 years; 90% of rates for

females set back 3 years.

- Beneficiaries Pub-2010 Amount Weighted Safety Contingent Annuitant Rates projected

generationally; 110% of rates for males and females set forward 2 years.

The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period from July 1, 2016 through June 30, 2020, except the change in the discount rate which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumptions as a result of the experience study and VRS Board action are as follows:

Mortality Rates (Preretirement, post-retirement

healthy, and disabled)

Update to PUB2010 public sector mortality tables. For future mortality improvements, replace load with a modified

Mortality Improvement Scale MP-2020.

Retirement Rates Adjusted rates to better fit experience for Plan 1; set

separate rates based on experience for Plan 2/Hybrid;

changed final retirement age.

Withdrawal Rates Adjusted rates to better fit experience at each year age

and service through 9 years of service.

Disability Rates No change Salary Scale No change

Discount Rate No change

Note 10-Pension Plan: (Continued)

F. Long-Term Expected Rate of Return: (Continued)

The long-term expected rate of return on pension System investments was determined using lognormal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

	.	Arithmetic Long-Term	Weighted Average Long-Term
Asset Class (Strategy)	Target Allocation	Expected Rate of Return	Expected Rate of Return *
(**************************************			
Public Equity	34.00%	5.71%	1.94%
Fixed Income	15.00%	2.04%	0.31%
Credit Strategies	14.00%	4.78%	0.67%
Real Assets	14.00%	4.47%	0.63%
Private Equity	14.00%	9.73%	1.36%
MAPS - Multi-Asset Public Strategies	6.00%	3.73%	0.22%
PIP - Private Investment Partnership	3.00%	6.55%	0.20%
Total	100.00%	- =	5.33%
		Inflation	2.50%
	**Expected arithm	etic nominal return	7.83%

^{*} The above allocation provides a one-year return of 7.83%. However, one-year returns do not take into account the volatility present in each of the asset classes. In setting the long-term expected return for the system, stochastic projections are employed to model future returns under various economic conditions. The results provide a range of returns over various time periods that ultimately provide a median return of 6.72%, including inflation of 2.50%.

G. Discount Rate

The discount rate used to measure the total pension liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that System member contributions will be made per the VRS Statutes and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Consistent with the phased-in funding provided by the General Assembly for state and teacher employer contributions; political subdivisions were also provided with an opportunity to use an alternate employer contribution rate. For the year ended June 30, 2023, the alternate rate was the employer contribution rate used in fiscal year 2012 or 100% of the actuarially determined employer contribution rate from the June 30, 2021, actuarial valuations, whichever was greater.

^{**} On October 10, 2019, the VRS Board elected a long-term rate of 6.75% which is roughly at the 40th percentile of expected long-term results of the VRS fund asset allocation at that time, providing a median return of 7.11%, including expected inflation of 2.50%.

NOTES TO FINANCIAL STATEMENTS

Note 10–Pension Plan: (Continued)

From July 1, 2022 on, participating employers are assumed to continue to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

H. Changes in the Net Pension (Asset)/Liability

		Total Pension Liability	Plan Fiduciary Net Position	Net Pension (Asset)/Liability
Balance at June 30, 2021	\$	18,833,874	\$ 19,559,859	\$ (725,985)

Net changes	_	323,806	(294,939)	618,745
Balance at June 30, 2022	\$	19,157,680	\$ 19,264,920	\$ (107,240)

Sensitivity of the Net Position Liability to Changes in the Discount Rate

The following presents the net position liability of the Authority, calculated using the discount rate of 6.75%, as well as what the Authority's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

		Current	
		Discount	
	1% Decrease	Rate	1% Increase
_	(5.75%)	(6.75%)	(7.75%)
Plan's not panaion (asset) liability	¢2 572 057	¢(107.240)	¢(2 220 125)
Plan's net pension (asset) liability	\$2,573,957	\$(107,240)	\$(2,230,125)

Note 10-Pension Plan: (Continued)

I. <u>Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources</u> Related to Pensions

For the year ended June 30, 2023, Augusta Water recognized pension expense of \$4,940. Augusta Water also reported deterred outflows of resources and deferred inflows of resources from the following sources:

	0	Deferred Outflows f Resources	Deferred Inflows of Resources
Net difference between projected and actual earnings on plan investments Differences between expected and actual experience Changes of assumptions Employer contributions subsequent to the measurement date	\$	1,380,382 175,883 226,202 294,260	\$ 1,937,404 447,993 - -
Total	\$	2,076,727	\$ 2,385,397

The \$294,260 reported as deferred outflows of resources related to pensions resulting from the Authority's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending June 30, 2024.

Amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending June 30		
2024	\$	(142,154)
2025		(285,745)
2026		(442,491)
2027	_	267,460
	\$ _	(602,930)

J. Pension Plan Fiduciary Net Position

Information about the VRS Political Subdivision Retirement Plan is also available in the separately issued VRS 2022 Annual Comprehensive Financial Report (Annual Report). A copy of the 2022 VRS Annual Report may be downloaded from the VRS website varetire.org/pdf/publications/2022-annual-report.pdf, or by writing to the System's Chief Financial Officer at P.O. Box 2500, Richmond, Virginia 23218-2500.

Note 11-Commitments and Contingencies:

Construction Contracts

Augusta Water is obligated under professional and construction contracts at year-end, as follows:

Major Projects	 Contracts	Remaining Commitment
Water		
Substandard Waterlines	\$ 136,500 \$	136,500
		136,500

Treatment Plant Equipment	65,694	65,694
Inflow & Infiltration	19,470	19,470
		85,164
Other		
Field Operations Building	1,871,378	845,347
Lab Testing/Supplies	45,829	45,829
Software	89,916	19,304
		910,480
Total Augusta Water Contract Commitments	\$	1,132,144

Note 12–Risk Management:

Augusta Water is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Augusta Water carries commercial insurance for these risks of loss including general liability and employee health and accident insurance. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past three fiscal years.

Health Insurance

Augusta Water employees, retirees and employee dependents are eligible for medical benefits from a health insurance internal-service fund. Funding is provided by charges to Augusta Water departments, employees and retirees. The program is supplemented by stop loss protection, which limits Augusta Water's annual liability.

Based on the requirements of GASB Statement No. 10, Augusta Water records an estimated liability for indemnity healthcare claims. The following represents the change in the fund's claims liability for 2023.

Year Ended	Beginning ded Liability				Increase Decrease					
June 30, 2023	\$	855,079	\$	1,499,812	\$	967,656	\$	1,387,235		

NOTES TO FINANCIAL STATEMENTS

Note 13- Pending GASB Statements

At June 30, 2023, the Governmental Accounting Standards Board (GASB) had issued statements not yet implemented by Augusta Water. The statements which might impact Augusta Water are as follows:

GASB Statement No. 99, *Omnibus 2022*, will enhance comparability in accounting and financial reporting and improve the consistency of authoritative literature by addressing (1) practice issues that have been identified during implementation and application of certain GASB statements and (2) accounting and financial reporting for financial guarantees. The portion of Statement No. 99 related to leases, PPPs, and SBITAs are effective for fiscal years beginning after June 15, 2022. The portion of the Statement related to financial guarantees and the classification and reporting of derivative instruments within the scope of Statement No. 53 are effective for fiscal years beginning after June 15, 2023.

GASB Statement No. 100, Accounting Changes and Error Corrections – an amendment of GASB Statement No. 62 will enhance accounting and financial reporting requirements for accounting changes and error corrections to provide more understandable, reliable, relevant, consistent, and comparable information for making decisions or assessing accountability. Statement No. 100 will be effective for accounting changes and error corrections made in fiscal years beginning after June 15, 2023.

GASB Statement No. 101, *Compensated Absences* will better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. That objective is achieved by aligning the recognition and measurement guidance under a unified model and by amending certain previously required disclosures. Statement No. 101 will be effective for fiscal years beginning after December 15, 2023.

Management has not determined the effects these new Statements may have on prospective financial statements.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION - VIRGINIA RETIREMENT SYSTEM

Note 1. Change of Benefit Terms

There have been no actuarially material changes to the System benefit provisions since the prior actuarial valuation.

Note 2. Changes of Assumptions

The actuarial assumptions used in the June 30, 2021 valuation were based on the results of an actuarial experience study for the period July 1, 2016 through June 30, 2020, except the change in the discount rate, which was based on VRS Board action effective as of July 1, 2019. Changes to the actuarial assumption as a result of the experience study and VRS Board action are as follows:

Non-Hazardous Duty

Mortality Rates (pre-retirement, post-retirement healthy, and disabled)	Update to PUB2010 public sector mortality tables. For future mortality improvements, replace load with a modified Mortality Improvement Scale MP-2020
Retirement Rates	Adjusted rates to better fit experience for Plan 1; set separate rates based on experience for Plan 2.Hybrid; changed final retirement age
Withdrawal Rates	Adjusted rates to better fit experience at each year age and service through 9 years of service
Disability Rates	No change
Salary Scale	No change
Discount Rate	No change

STATISTICAL SECTION

Statistical Section

This part of Augusta County Service Authority's comprehensive annual financial report presents detailed and unaudited information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Authority's overall financial health.

Contents

Financial Trends (Tables 1-7) Pages 62 - 69

These tables contain trend information to help the reader understand how the Authority's financial performance and well-being have changed over time as well as show how the revenue and expenses are split between the water and sewer departments.

Revenue Trends and Capacity (Tables 8-14) Pages 70 - 76

These tables contain trend information to help the reader assess the Authority's most significant revenue sources, user rates, and the growth in water and sewer connections.

Debt Service Trends and Capacity (Tables 15-16) Pages 77 - 78

These tables present trend information to help the reader assess the Authority's current levels of outstanding debt and the capacity to acquire additional debt with appropriate revenue coverage.

Demographic and Economic Information (Tables 17-19) Pages 79 - 81

These tables offer demographic and economic indicators for Augusta County to help the reader understand the environment within which the Authority's financial activities take place.

Operating Information (Table 20) Page 82

This table contains service and infrastructure data to help the reader understand how the information in the Authority's financial report relates to the services the government provides and the activities it performs.

Sources:

Unless otherwise noted, the information in these tables is derived from the audited financial reports for the relevant year.

Availability fees are collected for new and/or reserved water and sewer connections to pay for capacity related infrastructure improvements. Generally, these fees represent cash payments (100% payment on single lots or 10% downpayment or the balance due on major subdivision projects).

Developer dedications reflect the significant amount of construction in Augusta County and the dedication of infrastructure by the developers after they have met Augusta Water construction standards. Examples of infrastructures dedicated are sewer and water lines, pump stations, water tanks, and waste water treatment plants as well as the land or permanent easements on which this infrastructure is placed.

Notes: All customers (commercial, residential, industrial, institutional) pay the same fees, except for multi-family residential complexes, which (effective April 1, 2005) are charged the higher of a fee based upon meter size or the calculation of the number of units multiplied by an equivalent residential connection (ERC) factor. The ERC factors were phased in to be fully in effect on July 1, 2006. The ERC factors are as follows:

Multi-family (apartments) 1 unit = 0.36 ERC where 1.0 ERC is equal to the 5/8" meter rate; hotel room = 0.36 ERC; mobile home = 0.56 ERC.

2014	42,924,584		3,281,785	46,206,369	1,983	3.83%

Notes: Details on the Outstanding Debt can be found in Note 6 in the financial section.

The Bond MTI limits debt to the amount which can be covered as follows: net available revenue is 1.1 times the Senior debt service payments and 1.0 times the subordinate debt service payments (see Table 16).

⁽¹⁾ Total connections (water and sewer) data is found on Table 11.

⁽²⁾ Median Household Income (MHI) data is found on Table 17; where if a particular year's data is not available, the last available data is used.

Notes:

Source: Augusta County, Department of Building Inspections.

⁽¹⁾ General building permits include alterations and repairs.

⁽²⁾ Single family information is a subset of the total information but is only for new construction and does not include townhomes, duplexes or manufactured homes.

⁽³⁾ There is not a direct correlation: the time between permit issue and hook-up to public water varies widely, from several months to several years and many homes are built outside subdivisions and the public water (and sewer) service areas. New water connection information is from Table 11 which is reported in fiscal years (a six month delay).

COMPLIANCE SECTION

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Honorable Board of Directors Augusta Water

We have audited, in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and the *Specifications for Audits of Authorities, Boards, and Commissions,* issued by the Auditor of Public Accounts of the Commonwealth of Virginia, the financial statements of the business-type activities and the fiduciary activity of the Augusta Water (Authority), as of and for the years ended June 30, 2023 and 2022, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements, and have issued our report thereon dated December 7, 2023.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
