LANDFILL RAIN COVER REPLACEMENT

GENERAL:

The Augusta County Service Authority (referred to as OWNER below) acting as agent for the County of Augusta and the Cities of Staunton and Waynesboro will receive Sealed Bids to have a contractor purchase and install a rain tarp at the Augusta Regional Landfill.

In 2009, the Augusta Regional Landfill constructed a lined landfill cell (Phase 4) with a **12 mil geosynthetic rain cover** to minimize runoff into the leachate collection system. The rain cover is approximately 6.7 acres. The Augusta Regional Landfill has not begun filling waste in this cell and the existing rain cover is in disrepair.

The successful bidder will supply and install a new 12 mil DURA SKRIM or equivalent Rain Cover and 5' x 10' ballast grid with ¼" nylon rope tied in both directions. The existing sandbags are to be reused and slipped into new exterior sandbags. The existing rain cover will remain in place. The perimeter termination of the new cover should be sewn to the existing cover. The new 12 mil material will be white / black with white side up. Any waste material generated from this project may be disposed of on-site free of charge.

A non-mandatory pre-bid meeting will be held June 29, 2016 at 1:30 PM at the Augusta Regional Landfill, 749 Christians Creek Road, Staunton, VA 24401. **This is a different location than where the bids are to be submitted.**
